Additional Information		
<p>Works with clients of all ages who have difficulties with behavior, thoughts, or feelings. These difficulties may include depression, anxiety phobias, aggression, child abuse, self-harming, eating disorders, and any form of trauma they may have experienced either directly or in-directly. Provide integrated therapies, education, and case management services, monitor progress, and review and adjust plans based on client progress or lack of progress.</p>		
Job Description		
<p>This is a flexible unit with a great opportunity to work as part of an interdisciplinary team to collaboratively conduct mental health treatment, assessments, and trauma informed interventions. Work with Licensed Chemical Dependency Counselors, case managers, and child care workers to integrate trauma informed services into the residential treatment program. Provide individual, group, and family therapy to children and adults. Collaborate with the National Child Traumatic Stress Network to develop trainings and modify interventions. The therapist will have the opportunity to attend trainings and conferences in multiple locations through the country allowing a great opportunity for advancement and networking.</p>
